

Physical Activity Policy

At Allsorts Childcare, we aim to promote the health and well-being of the whole setting through encouraging physical activity and providing consistent messages to children, parents and staff.

We are aware that children of all ages should be active. Being active is important for children under five because it helps them to build and maintain a good level of health; physical activity is essential for growth and development. Children under five need time to play and learn new skills; the early years are also an important time to establish good habits relating to physical activity.

We follow the guidelines set out by the Chief Medical Officer regarding how much physical activity children under five should be taking part in:

Children who are not yet walking

Physical activity should be encouraged from birth, through floor-based play, reaching, grasping, rolling, etc. Babies should also have 30 minutes of tummy time every day, spread throughout the day

Children who are confident walkers

Children should be physically active for at least three hours throughout the day. For pre-schoolers, 60 minutes of this time should be moderate to vigorous activity.

Allsorts curriculum includes planning our indoor and outdoor activities. For children who can walk we encourage all children to join in daily with Allsorts Active in which we use Healthy movers activities implement by staff who have done the relevant training. For children who cannot walk, we encourage movement through the use of treasure baskets and floor play which helps encourage children to reach and grasp.

More confident walkers, we encourage the children to participate in dancing, obstacle courses etc. We ensure that the children have as much time outdoors as possible. We conduct risk assessments, both internally and for off-site visits to ensure the safety of all the children in our care.

We minimise the amount of time children spend being sedentary (except sleeping time). This includes low-energy activities such as sitting or lying down which limits the child's opportunity to move. Children are only required to sit when eating and not for extended periods of time.

All children, including those with special education need and disabilities (SEND) are entitled to a comprehensive programme of physical activities.

We are confident in providing advice to parents and carers in relation to families adopting healthy lifestyles and being physically active.

Our staff aspire to be positive role models for our children. We aim to take part in physical activity whenever possible as the staff join in when the children are doing physical activity in the settings.

All physical activity is in line with our Health and safety - general policy and Overall approach to risk assessments policy.
